

The “Value” of Propaganda:

Understanding China’s Policies in a New Light

Weifeng Zhong, Ph.D.

Senior Research Fellow

Mercatus Center at George Mason University

December 4, 2019

The raw materials

The People's Daily

- official newspaper;
- 1946 to present;
- 2 million articles.

A profound and profoundly simple idea...

Propaganda is effective, and it often precedes policies.

A profound and profoundly simple idea...
...brought to you by these guys:

A profound and profoundly simple idea... ...brought to you by these guys:

It's a fundamental necessity
*"to transform the press... into
a serious organ for the
economic education of the
mass of the population."*

— Vladimir Lenin

The purpose is to *"convince
the masses... that [our] policy
is sound, thus... inducing the
broad masses of the workers
to follow [our] lead."*

— Josef Stalin

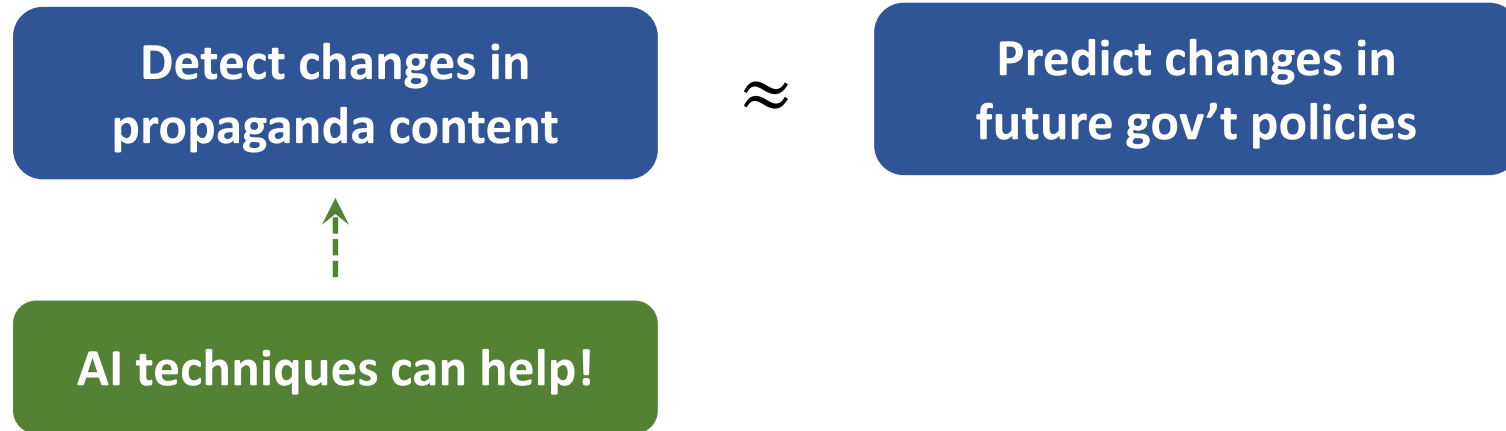

The “value” of propaganda

**Detect changes in
propaganda content**

≈

**Predict changes in
future gov’t policies**

The “value” of propaganda

The product

Policy Change Index (PCI): a series of machine learning algorithms that predict policy changes by “reading” propaganda messages.

PCI algorithms

Two PCI algorithms in the lineup:

1. **PCI-China**: predict China's policy moves (with trade-war implications);
 2. **PCI-Crackdown**: predict China's response to the Hong Kong protests.
- And more to come!

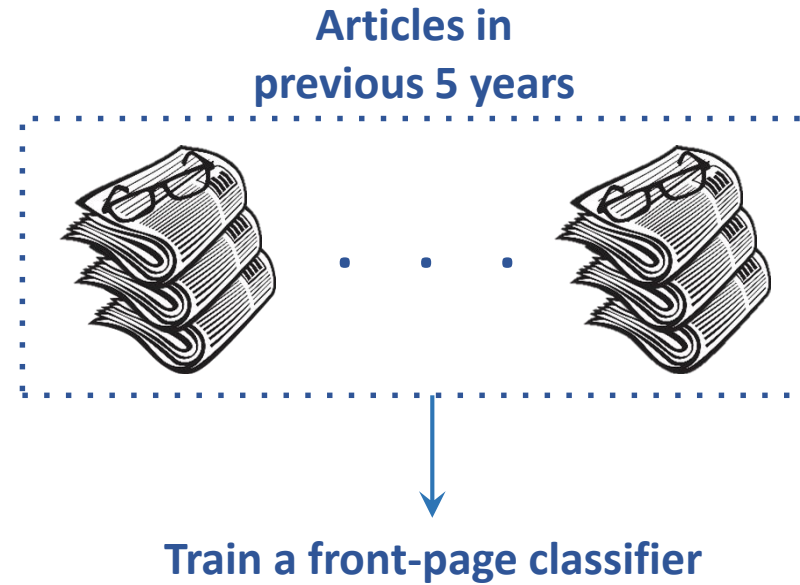

* Joint with Julian Chan (Bates White).

1. PCI-China

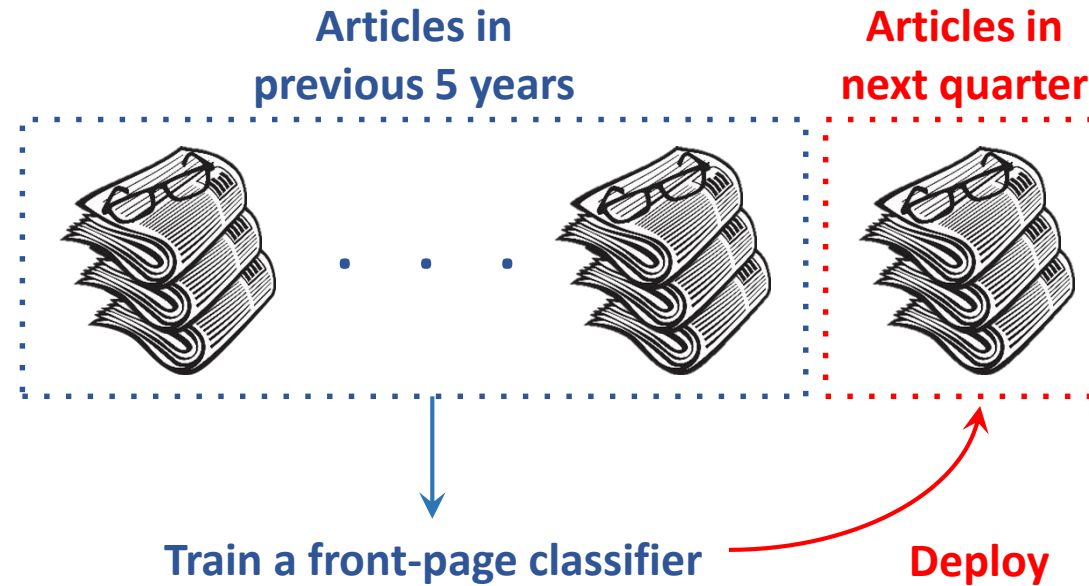

PCI-China: the question

Will China change its policy priorities, and in what way?

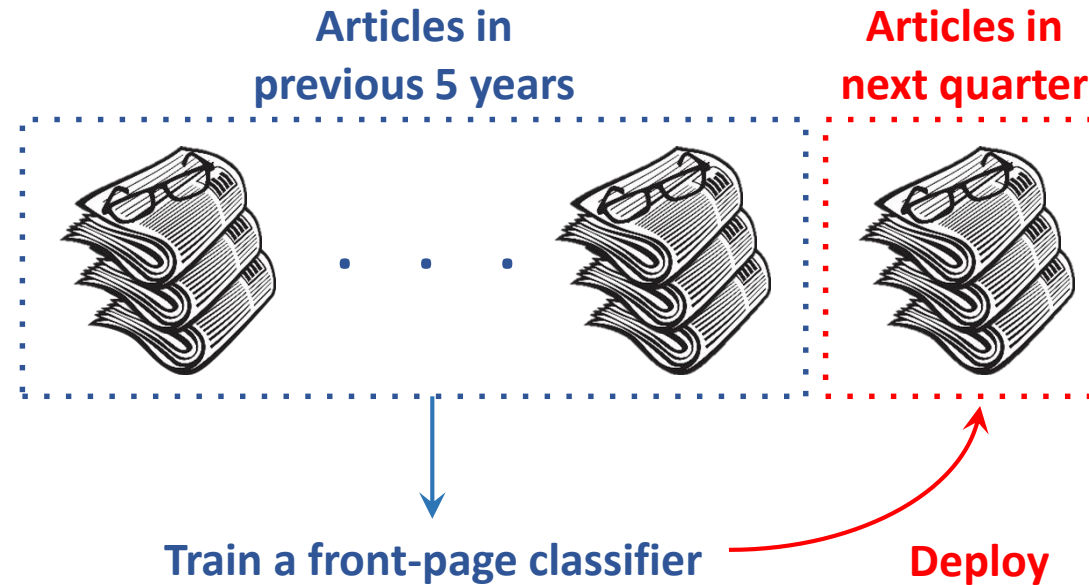

PCI-China: algorithm

PCI-China: algorithm

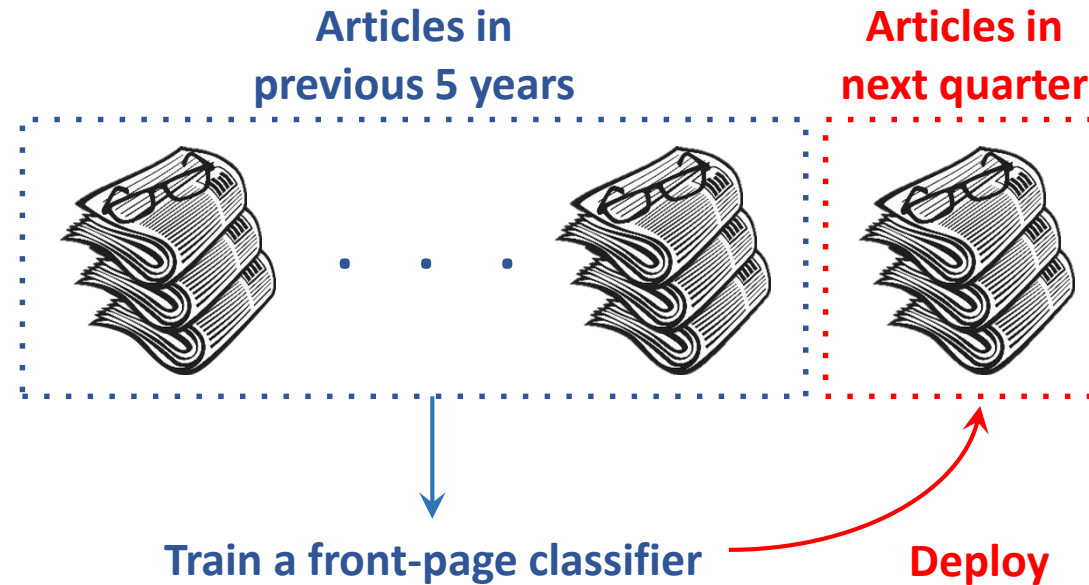

PCI-China: algorithm

PCI-China: the difference in performance

PCI-China: algorithm

PCI-China: the difference in performance

Large **PCI-China** \Rightarrow Change in editorial emphasis

PCI-China: result

PCI-China: result v ground truth

PCI-China: what does the future hold?

Trade-war implications

Two upticks in 2018 Q1 and 2019 Q1:

- Internally: strengthening party authority;
- Externally: nationalism and global leadership.

Market expectations in April: trade deal imminent.

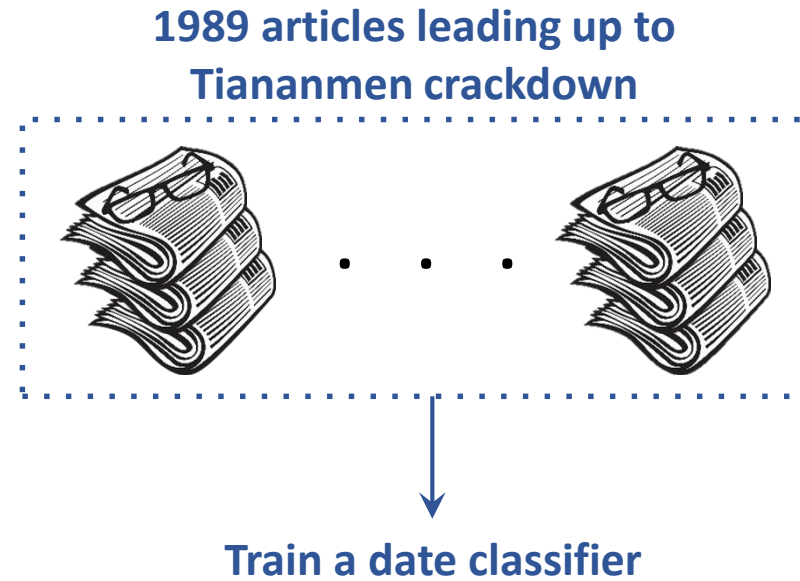

Our consistent prediction since January: curb your enthusiasm...

2. PCI-Crackdown

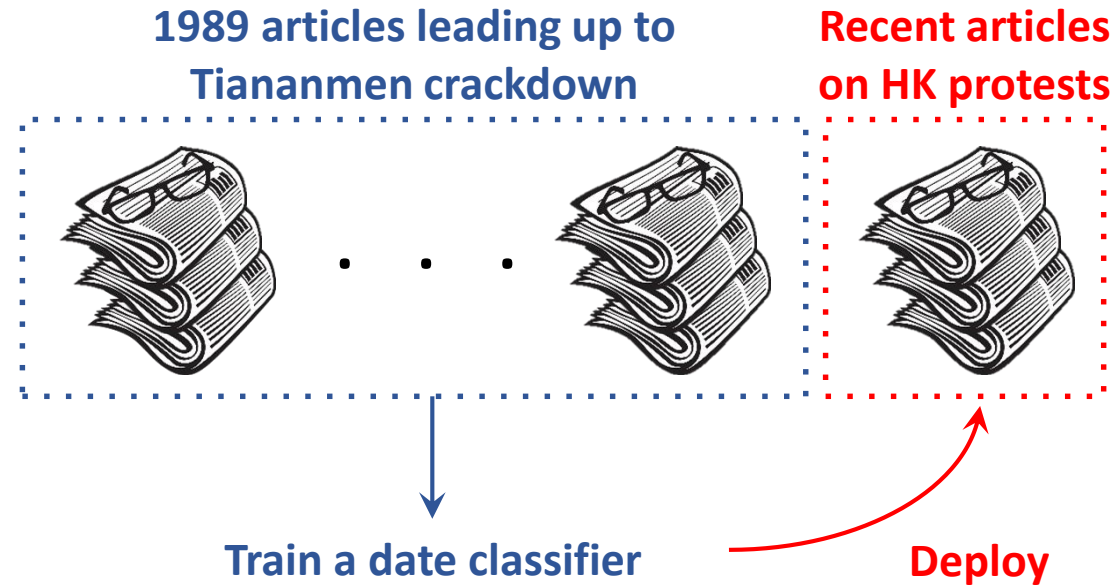

PCI-Crackdown: the question

Will the Hong Kong protests be met with a Tiananmen-like
crackdown by the Chinese government?

PCI-Crackdown: algorithm

PCI-Crackdown: algorithm

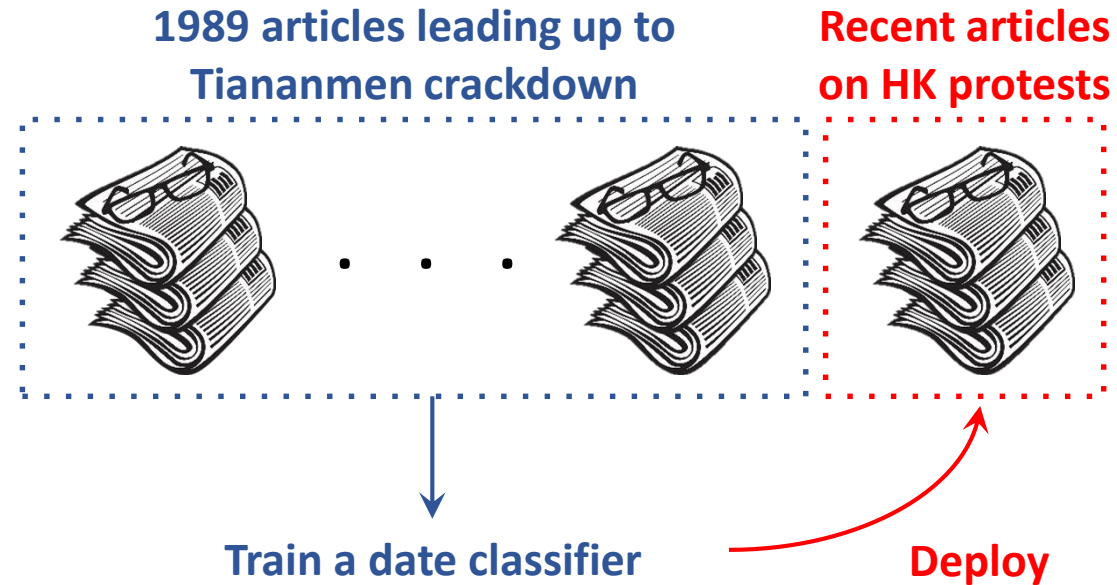

PCI-Crackdown: algorithm

PCI-Crackdown: mapping each current date to an “as-if” date

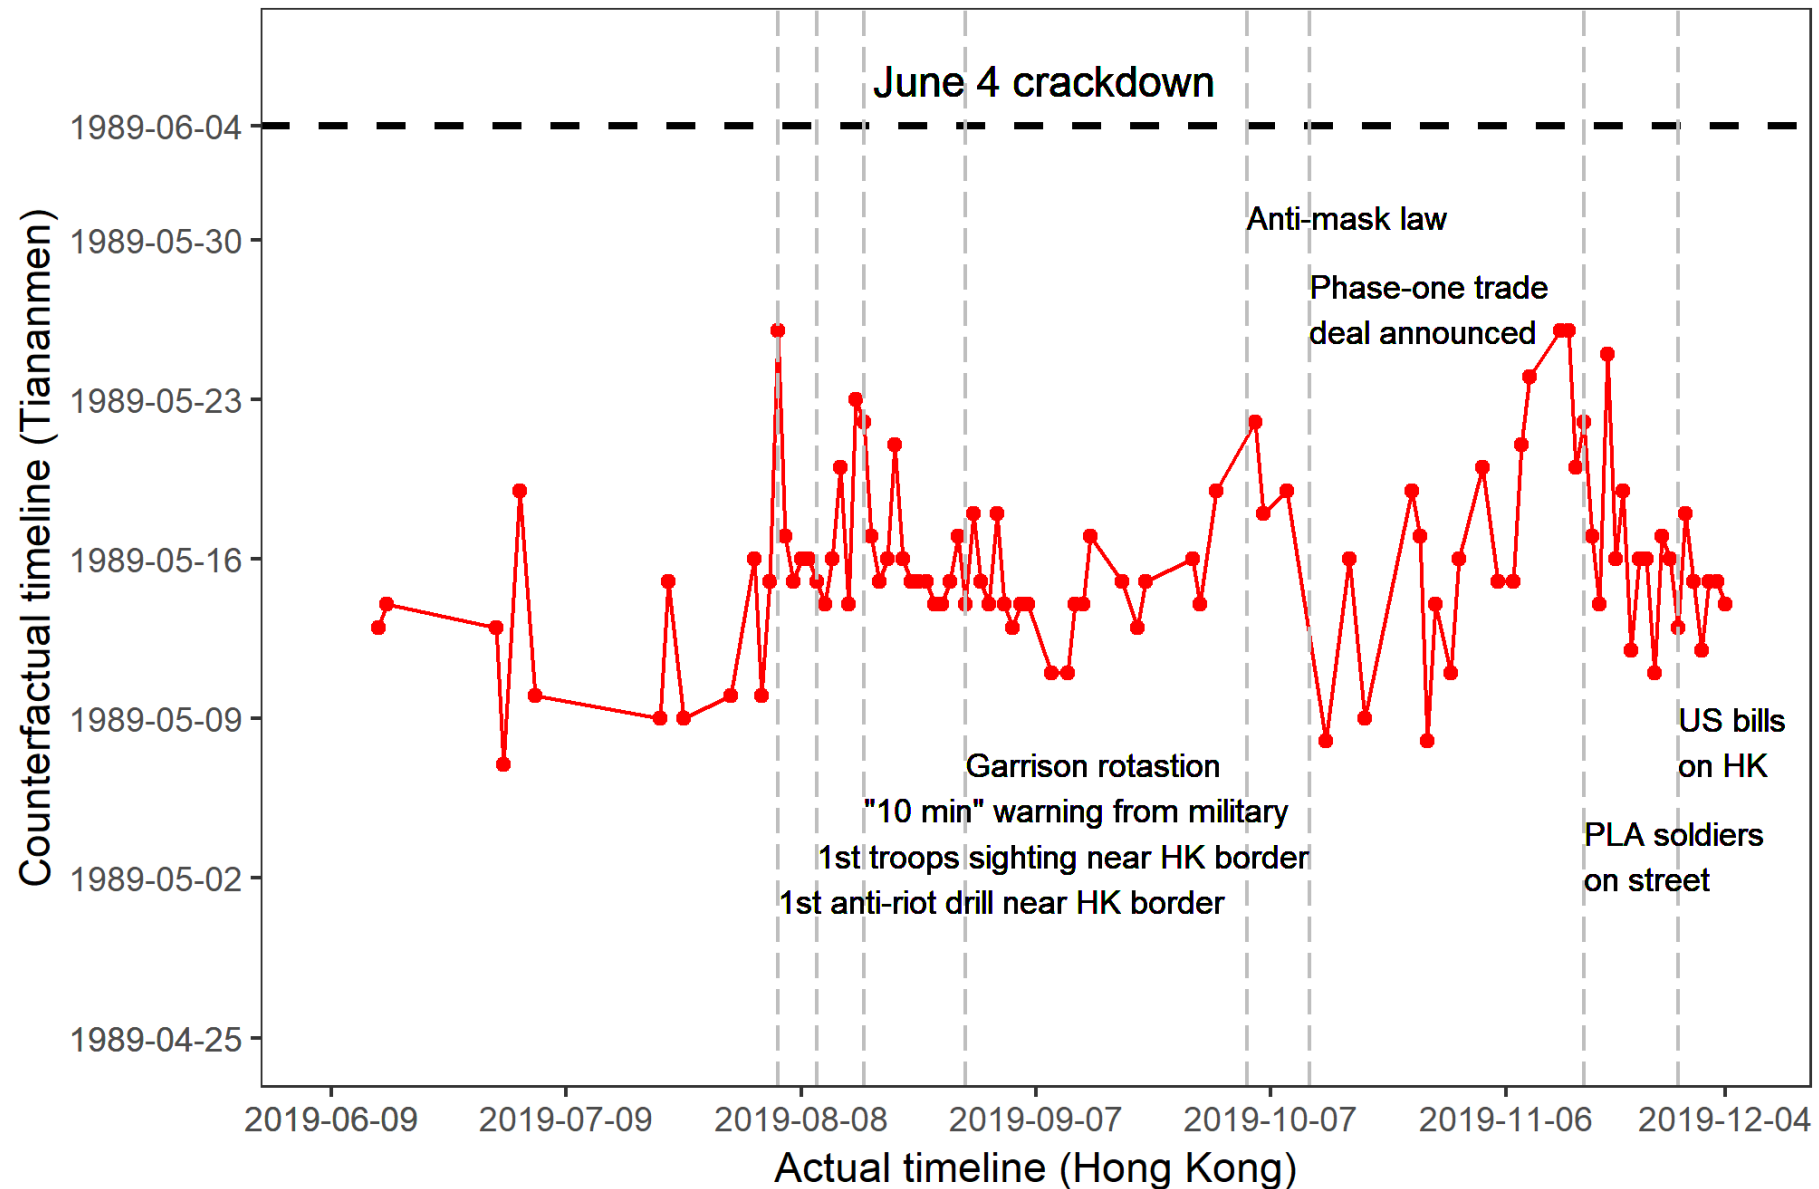

PCI-Crackdown: algorithm

PCI-Crackdown: mapping each current date to an “as-if” date

PCI-Crackdown closer to June 4 \Rightarrow Crackdown more likely

PCI-Crackdown: 2019 Hong Kong protests

Future PCI algorithms

Stay tuned for more in the PCI pipeline:

- PCIs for other countries: North Korea, Russia, Iran, Cuba,...
- PCI sub-indices by issue: trade policy, fiscal policy, foreign policy...
- And more to come!

How can these be useful to you?

Taking the first step

The first step toward policymaking is to understand the problem.

We have cracked a window to an otherwise close system.

You should start peeking inside.

Or, if you have two million other documents...

Takeaway

Propaganda is effective, and it often precedes policies.
